Our Experience

IS Security Consultancy Support Services are available to all MoD departments through the ICS Catalogue; an enabling arrangement under which companies have qualified through a competitive procurement process with the MoD to demonstrate that they meet a minimum set of mandatory and desirable capability criteria to deliver IS Security Consultancy Services to MoD customers.

Activity together with two other leading consultancy companies: r2b2, and GSS; provide security consultancy services through the MoD ICS Catalogue, listed under r2b2 who head our consortium. We bring together the skills, knowledge and expertise of INFOSEC specialists, with significant experience in delivering security projects to the MoD, HMG, Commercial and Finance sectors. The consortium provides a significant and varied knowledge base for Clients to draw upon, with the confidence that our team will be the right one to deliver the project, and have the skills to ensure your requirements are met, and your expectations exceeded.

Our Consultants

We have a large pool of highly skilled Principal and Senior Consultants. Their skills and accreditations include CLAS, ISO27001 Lead Auditors, CISM, CISA, CISSPs, CHECK Team Leaders and Members, CREST accredited consultants, engineers holding the top qualifications with Checkpoint, Juniper, Radware, Finjan, Websense, and Bluecoat amongst others. Our consortium's Microsoft qualifications give us Gold Partner status in Networking, Advanced Infrastructure and Security, with Information Worker expected shortly. This skill set has allowed us to become one of a few MS Gold Partners to work with Microsoft directly on Identity Lifecycle Management.

Full information on the wide range of services available to MoD users of the Catalogue can be obtained from the following web-site www.icscat.mod.uk – once MoD users have registered on the site they can log on to obtain detailed information on all the services available and further details on all qualified suppliers (including day-rates).
